

Eco Church: Tips, Ideas and Prayers

15 July 2026

Prayer for Creation

Heavenly Lord,
We come before You in a time of reflection.
We acknowledge the beauty and fragility of the Earth,
which sustains all living beings.
We ask for Your guidance and wisdom in caring for our planet,
ensuring that it remains a place of life and sustenance for all.
We pray that we will be good stewards of your beautiful creation
and that we will protect it for the generations yet to come.
May we, as individuals and communities, work together to protect
and nurture the natural world, honoring the sacredness of creation
and the life it holds.
Amen.

Eco-Friendly Tips

For Churches – Plant something together: Create a wildflower area. It is easy to care for, and wildflowers attract the pollinator insects.

For individuals – Save water: Rather than running the cold tap to get a glass of water, keep a jug or bottle in the fridge. That way, the water will be cold when you need it, without wastage.
